Budget Enhancement Project

86                      The hookup was problematic. As a result, the demonstration was poor.

Budget Enhancement Project

85                      Find out experience / knowledge of attendees at beginning. The majority of the attendees were lost because it was assumed that we knew more than we dd.

Data Warehouse

73                      Hyperion part was ok

Data Warehouse

67                      Very hard to understand

Data Warehouse

33                      2nd speaker - Only one question was asked - about the need to hand enter data gathered through queries. No direct CAMS interface.  
The 1st speaker needed a platform to stand on so she would be visible over her laptop. We did not have time for demo. Very disappointing to hear that the warehouse must be "hand fed"

Year-End Process and Audit Reports

38                      What Group should have attended this session budget or finance?
